Merchant Link Mobile App Updates

9/18/23.

Multi-Factor Authentication (MFA) update has been made available today, 9/18/23.

This update includes the following:

- **MFA 'Call Me' Option:** When clicking 'Call Me', screen now changes to 'Call Me' rather than 'Text Me'.
- **MFA Phone Number:**
    - Change to only allow users to enter a 10-digit phone number (i.e., without a prefix of '1').
    - Added Phone Number Confirmation field to allow users to re-enter their phone number if incorrectly entered.
- **MFA for Users with Single Location** - Fix to display MFA for users with a single location.
- **Transaction History - Discounts:** Correctly displays discount amounts where Transaction ID is greater than 10 digits long.

Note: In order for the updates to be activated, vendors will need to manually update their Merchant Link app by downloading it from the App Store (iOS/Apple) or Google Play (Android).
