

ALLEN POND
T35 MD, Hancock Co.
U. S. G. S. Lead Mountain, Me.

Fishes

Brook trout (squaretail)	White sucker
Yellow perch	Minnows
Chain pickerel	Fallfish
Alewife	Pumpkinseed sunfish
Eel	

Physical Characteristics

Area - 83 acres	Temperatures
	Surface - 71° F.
Maximum depth - 27 feet	27 feet - 52° F.

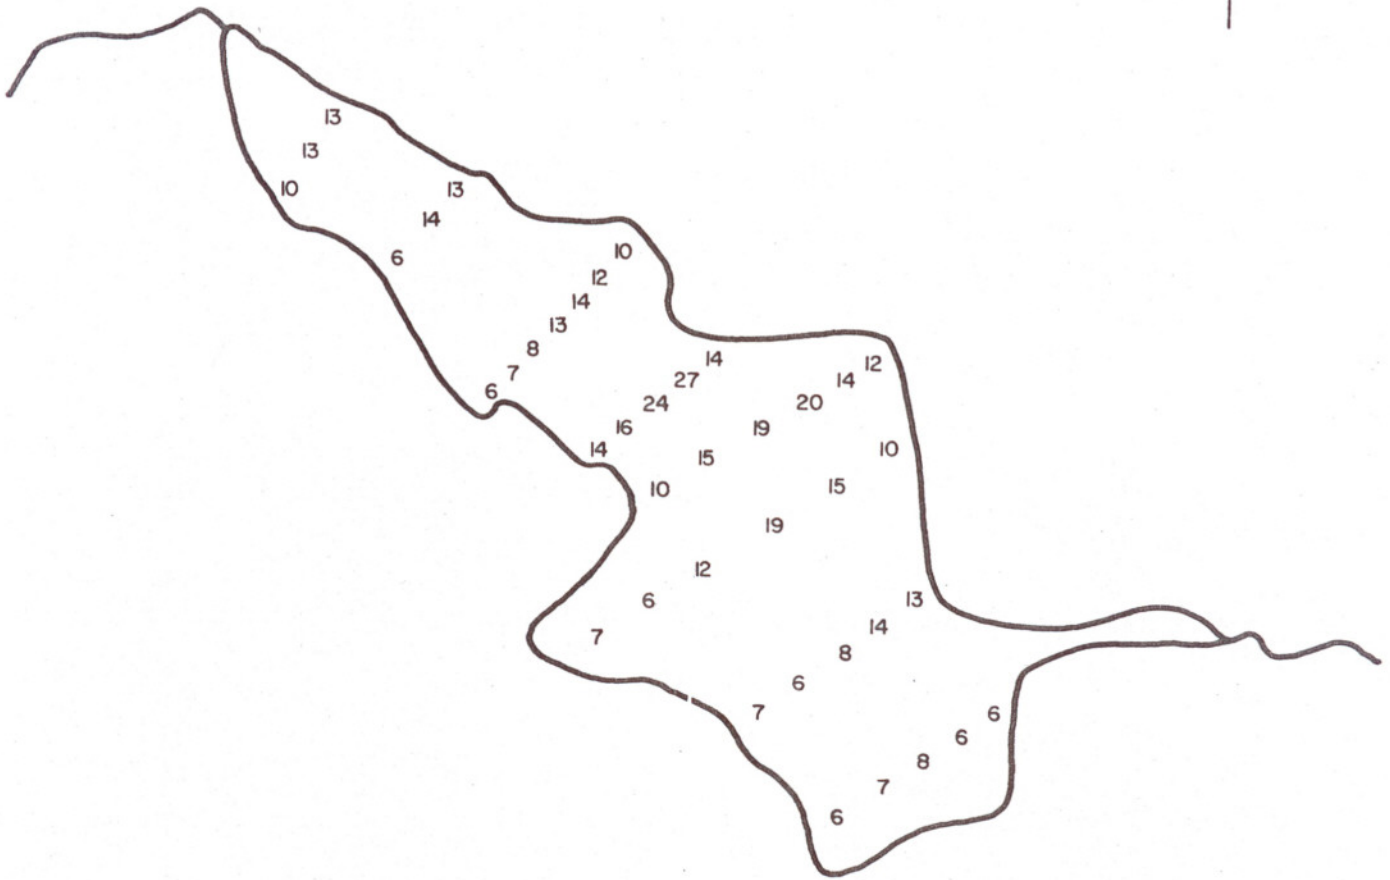

Suggested Management

Management of Allen Pond at the present time should emphasize chain pickerel and yellow perch. It is unlikely that stocked brook trout would co-exist satisfactorily with the well-established pickerel and perch. No stocking is recommended.

A brook trout fishery could probably be established by chemical reclamation and subsequent stocking. However, the pond is isolated and the light fishing pressure it receives makes reclamation impractical.
