LITTLE LILY LAKE Marshfield and East Machias Twps., Washington Co.

U. S. G. S. Gardner Lake, Me.

Fishes

Brook trout (squaretail) White sucker

Ninespine stickleback

Physical Characteristics

Area - 6 acres

Temperatures

Surface - 67° F.

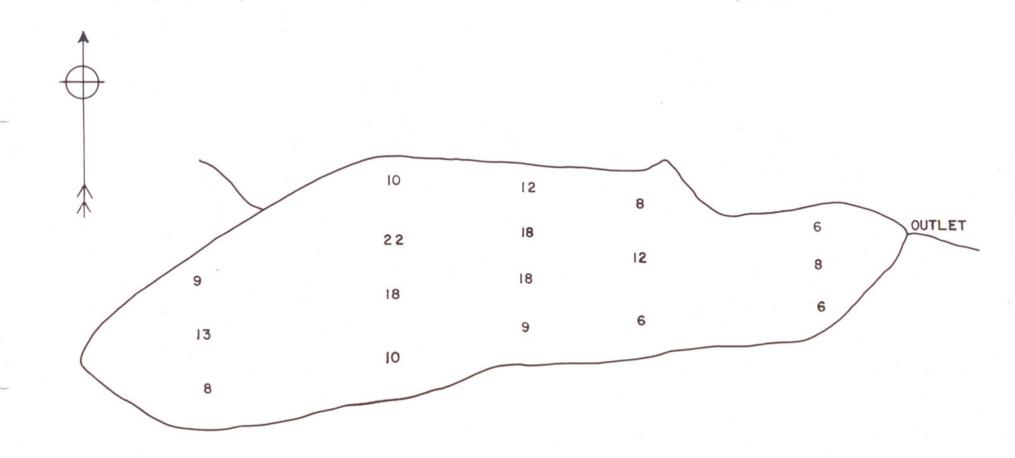

Maximum depth - 22 feet

22 feet - 46° F.

Little Lily Lake has a small volume of water suitable for brook trout. Little natural reproduction occurs, so periodic stocking will be required to maintain the fishery.

Use or possession of live fish as bait should be prohibited to reduce chances for introduction of competing species.

Surveyed - August, 1958 Maine Department of Inland Fisheries and Game
