ROUND POND

Lyman Twp., York Co. U.S.G.S. Bar Mills, Me. (7.5')

Fishes

Brook trout Minnows Golden shiner White sucker

Physical Characteristics

Area – 6 acres	Temperatures:
	Surface - 78°F
Maximum depth – 36 feet	36 feet - 41°F

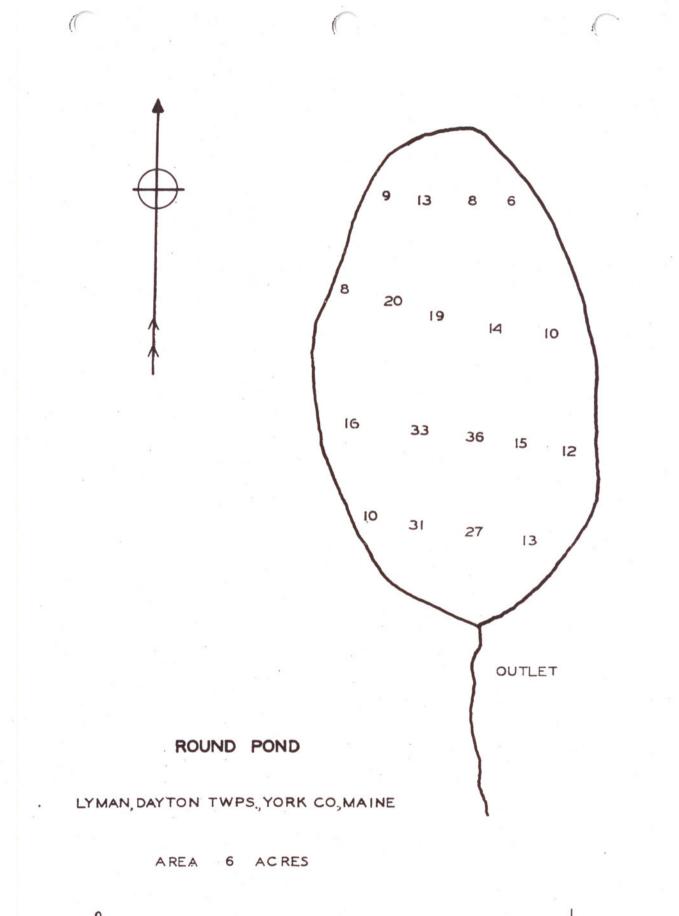

Principal fisheries: Brook trout

Round Pond is a small, undeveloped water located on property owned by York County Fish and Game Club. The pond thermally stratifies during the summer, providing a band of cold, oxygenated water suitable for trout management.

Round Pond was chemically reclaimed in 1946 to remove competing species (hornpout, pickerel, and golden shiners) and enhance brook trout management. Golden shiners (confirmed in 1980) and white suckers (confirmed in 1998) have since reestablished from illegal stocking(s) and will compromise brook trout enhancement efforts. The open water fishery is maintained by an annual spring and fall stocking program.

York County Fish and Game Club provides anglers walk-in access along an existing gated gravel road located off the Mast Road.

Surveyed – August 1952 (Revised – 1958, and 2002) Maine Department of Inland Fisheries and Wildlife Funded in part by the Federal Aid in Restoration Act under Federal Project F-28-P L5038A
