

COASTAL COMMUNITY GRANTS: Water Quality and Land Use

Southern Maine Planning and Development Commission: Development of Checklist and Technical Standards for Erosion and Sediment Control Plans for Municipal Separate Storm Sewer System (MS4) communities

PARTNERS

Cumberland County Soil and Water Conservation District, Integrated Environmental Engineering Inc. and municipal staff of the Southern Maine Stormwater Working Group and Interlocal Stormwater Working Group of the Greater Portland area

PROJECT DESCRIPTION (Anticipated completion December 2021)

The purpose of this project is to develop regional checklist and standards document for Sediment and Erosion Control Plans for development sites to inform ordinance revisions and ensure sound stormwater management, minimize soil pollution and protect the region's water quality. Funds provided to this project will be used to facilitate at least three meetings and two workshops of municipal representatives, review technical documents by the project team, and develop needed materials for assisting participating municipalities address and at a minimum meet state requirements and anticipated requirements for ordinance revisions along with incorporation of local goals and consistencies across communities. The documents will be used by municipal personnel to update ordinances in the next two years to ensure sound stormwater management, minimize soil pollution and protect the region's water quality.
