Complaint Overview CY 2023

| Торіс | Complaint Details |
|--|---|
| Drift | Caller states that they could smell and taste pesticides being applied to potato field across the street on the morning of July 10, 2023. The wind was blowing in the direction from field to their home. Concerned about chickens that may have been exposed and general off target deposition of pesticides. |
| Drift | Caller observed applicator spraying without regard to the property line. Caller stated that pesticide drifted onto their property and has likely contaminated their vegetable garden. |
| Drift | Caller witnessed an individual making a mosquito control application with tractor mounted spray equipment at neighboring property. Caller is concerned that the spray material drifted onto their organic vegetable garden. |
| | Rebecca Gray was working in her gardens and watched a Tick & Mosquito Offense employee making tick applications with a powered backpack sprayer. According to Gray, she watched a cloud drift onto her property. Gray has both chickens and pigs. |
| Drift | She confronted the applicator, who stopped spraying near her property. According to Gray, the wind was gusting at 16 to 23 mph. |
| | |
| | Caller is an apiarist that maintains 18 seasonal bee yards each containing 32 hives in various locations across Hancock, Washington nd Aroostook Counties. Approximately 2 weeks ago caller witnessed a boom sprayer operating in a potato field within 500 ft. of their bee yard in Fort Fairfield. Caller stated they felt the mist hit their |
| Drift | face while standing in the bee yard. Caller believed winds were above 15 miles an hour and the application was being made without regard to the bees or presence of humans. Caller has experienced nearly 40% loss in bees this year and is concerned that poor pesticide use practices may be part of the issue. |
| Drift | Ms. Braddick called the BPC about an application from Mainely Grass that went onto her property. The property being treated is located at 21 Ocean View Drive, Kennebunk, Maine. |
| Drift | Caller is concerned about drift onto their property during a mosquito/tick spray application at a neighboring property on May 17, 2023. Caller was alarmed about dangers of the pesticide as the applicators was wearing a respirator. |
| D-16 | Caller is concerned about drift of pesticide onto their property during an application made at the neighbor's property to control ticks and mosquitoes on 5/23/2023. Caller stated wind was blowing from neighbor's property towards their property. Caller believes pesticide drifted into their chicken coop and exposed chickens and |
| Drift Human Exposure / Health Effects | eggs. Caller is experiencing symptoms of burning lips and tongue and severe headache. Caller believes they were exposed to herbicide while an application was being made to a corn field across Milo Rd. from their property on Saturday morning, July 1, 2023. Caller was mowing lawn when they when they could taste the chemical, then had a headache for about an hour. |
| Human Exposure / Health Effects | Caller is concerned that residents at 13 Evergreen Lane in Industry are applying pesticides multiple times a day, everyday. Caller believes these applications are causing adverse health effects to his family. See attachment. |
| Human Exposure / Health Enects | Caller is concerned that there is a bed by infestation in their apartment unit and complex. They believe other tenants may be using pesticides are are netring their apartment overright and in early coming hours causing nausea, dizziness and discoordination among other symptoms. After inspection of their unit |
| Human Exposure / Health Effects | concluded there was not a bed bug infestation (one bed bug casing found), they are still getting bitter. |
| Human Exposure / Health Effects | Caller is concerned that he and his dogs are being exposed to harmful pesticides when applications are made to an agricultural field adjacent to his property. Caller is concerned about spray activity within 10 feet the property line. |
| Human Exposure / Health Effects | Caller was concerned about pesticide application made at a neighboring property in Topsham. Caller is concerned about application made on a windy day and effects on the environment. |
| Human Exposure / Health Effects | Caller believes they have been exposed to pesticides from the neighbor's fire pit. Caller is concerned that the neighbor may be using old pesticide barrels as burn barrels and the smoke contains fumes that are chemical in nature and causing adverse health effects and inability to enjoy their property. |
| Human Exposure / Health Effects | Caller is concerned about possible pesticide use on medical marijuana. |
| Human Exposure / Health Effects | Caller is concerned about effects on human health and the environment following a brown tail moth application at a neighboring property. Caller described the use of a truck mounted mist blower. |
| | Caller expressed concern that an applicator for a tick control comapny wanted to apply pesticides for mosquito control at a property where an arborist crew was working. Caller is concerned that the applicator told the work crew that the product was safe and they didn't have anything to worry. The work crew which included |
| Human Exposure / Health Effects | licensed pesticide applicators requested information about the product to be applied. The applicator told them he was using bifenthrin and they were totally safe. No additional information was provided. Ultimately the application did not happen. |
| Human Exposure / Health Effects | Caller stated they experienced watery eyes and metallic taste following an application to an agricultural field that is adjacent to their property on 8/23/2023. |
| Laws/Policies | Email received on 12/22/2023 raises concern about herbicide applications being made to GMO corn for wildlife feedplots. Facebook states the individual is doing weed control on GMO corn for themselves and customers. Email questions if this practice is legal. |
| | Caller has Bedbug infestation in their apartment. Caller moved into apartment on January 1, 2023. They notified the landlord on Friday, January 13, 2023. that there were bedbugs in their apartment. Caller reports the landlord claimed that an ozone generator was used to kill any organisms between tenants. Caller believes |
| Laws/Policies | bedbugs migrated to their apartment from the apartment upstairs. Certified pest control company arrived on January 31, 2023 to begin mitigating the bedbug infestation. |
| Laws/Policies | Caller reports that their apartment complex is under new management. The new management company is requesting that all units be treated for bedbugs. Caller says they do not have bedbugs and do not want pesticides applied in their apartment. Caller is concerned that they will be evicted for not allowing their unit to be treated for bedbugs. |
| License Issue | for bedbugs. Correspondence received indicates that a Lawn Service is making pesticide applications without proper licensing. Applicator may have an active license with another company. |
| License Issue | Caller witnessed a spray application to turf while an employee was mowing a lawn in Bangor. The lawn mower had a small tank with liquid that operate was using to spray broadleaf weeds. Operator did not have any PPE, shorts and t-shirt, no gloves while applying. |
| License Issue | Caller is concerned that a lawncare is operating without proper commercial applicator licensing while performing lawn move made a sinat care perticulate weaks as the spiry broadean weeks. Operator du normate any response and resina, no gover wine applying. |
| License Issue | Caller is concerned about a facebook post showing a man using a granular spreader to apply an organic tick control product to the public dog park in Standish. Caller believes the individual is not a licensed applicator. |
| License Issue | Store is offering pesticides for sale without a general use pesticide dealers license. |
| License Issue | Caller is concerned this company is applying antimicrobial pesticides for mold and mildew remediation without proper applicator licensing. |
| License Issue | Maine CDC Health Inspection Program was following up on a complaint regarding fly activity at the restaurant. During the inspection a bottle of Harris Fruit Fly Treatment was observed. The inspector also observed a restaurant employee use Hot Spot Foam Treatment in a drain where fruit fly activity was occurring. |
| License Issue | Email received by BPC on 6/19/2023 was to report a tree injection pesticide application to control brown tail moth made by an unlicensed applicator in Boothbay Harbor during the week of June 4, 2023. |
| License Issue | Large box stores have renewed GUPD Licenses for 2023. |
| | |
| License Issue | Caller believes company that conducted mold and mildew remediation services at their rental is not properly licensed. After remaining away for 24 hours as told to do so, caller states that their home still has strong chlorine smell. Application company did not provide all labels and SDS's for products applied as requested by caller. |
| License Issue | Caller is a treasurer of a condo association in South Portland. The property management firm has hired a cleaning company to conduct mold and mildew remediation work. Caller is concerned that company may not have the proper licensing to perform mold and mildew remediation work. |
| License Issue | Inspector from the Health Inspection Program observed insecticides in the kitchen at the restaurant for use by employees. |
| License Issue | Caller is concerned that the owner and applicator for this company has a Spray Contracting Firm License, but is not a Certified Master Applicator. Caller has seen the this company operating in the Sebago Lake Region throughout 2023. |
| License Issue | On 1/10/2023 it came to the attention of BPC Staff that a tree care company had an unlicensed applicator make tree injections to control browntail moth in the fall of 2022. The company had a CMA on staff. The applicator had passed their core and 3A exams but had not submitted a license application and payment. License application and payment were received by the applicator in-person on 1/10/2023. |
| License Issue | Caller is concerned that an applicator with a lawn care company is making pesticide applications without proper commercial applicator licensing. |
| Non-Target Effects | Caller is concerned that an applicator with a tawn care company is making pesticule applications without proper commercial applicator utersing. |
| Non-Target Effects | Caller witnessed a mospitulo control application on June 7, 2023. Caller stated that rain occurred within 2 polycation. They are worried about environmental impacts of pesticides applied during rainy conditions. |
| Non-Target Effects | Caller teff a message for the BPC stating they witnessed dead crows at a Golf Club. Caller believes dead crows are a result of an improper grub control application. |
| Non-Target Effects | Caller is concerned that growers at a farm may be using rodent bait in around the crops to combat woodchucks and other wildlife. |
| - | |
| Non-Target Effects | Caller states that neighboring property is having Japanese knotweed controlled with herbicides. Caller believes that 2 arborvitae and 2 lilacs on their property have died and that their vegetable garden is now being affected as well. Caller believes it is herbicide damage from the knotweed control at the neighbor's property. |
