I am writing in support of the Belfast land based aquaculture project being pursued by Nordic Aquaculture farms.

I am a business owner in Waldoboro which will soon be the location of a land based Eel growing facility. I am also in the natural fertilizer business and know that there is an opportunity to make fertilizer from the waste stream of any land based aquaculture operation, and know, as you do, that converting that waste stream into a valuable agricultural product instead of allowing it to become water pollution from the more traditional cage grown salmon will be a big win for the environment.

The Waldoboro Business Park is also the location where a land based Oyster operation is located.

Thank you for considering my input.
