

March 9, 2020

Dear Jessica,

My husband and I are proud residents of Beautiful Beech Hill Pond, and are very much opposed to the Silver Maple Wind Project in Clifton, Me.

We look out of our windows and see ~~that~~ the windmills are now there, and don't want to look out at 5 more, larger and taller than what's already there now.

These windmills take away from our scenic view, and the beauty of Beech Hill Pond. We see the blinking red sites in the rite time too.

The 5 additional windmills proposed are going to be larger and taller than the ones there now, at least 100 ft. higher and larger! They do not belong where they can be seen from a number of ponds in our area, and they also will lower our property values!

And these windmills will have negative impacts on our beautiful birds, our Eagles, and others, the fish in the area, the bats and other wild life, this will negatively impact our Pond forever; so I hope you take this all under consideration, and find some other place, away from scenic ponds, and people!

Sincerely,

Blake and Judy Brown
