I am sending my sincere request that you do not accept the Silver Maple Wind project in Clifton, Maine. I am a camp owner on Pristine Hopkins Pond in Mariaville. I comply with all the rules for my property and am conscientious to protect our water quality. The impact on our small pond will be devastating for our water, view and our property taxes. My property has to abide by strict regulations in height. How can the next town over build 600ft eyesores that will be seen for miles? I am disappointed in the Maine DEP for its willingness to accept applications of this nature that are not even eco friendly in their materials, construction and impact on the environment. I have yet to hear a way to decommission the metal when they are no longer viable. Unlike a random cell tower, these structures have no financial gain for us. Is there a price for our pristine landscapes? I say no! Leave our lake alone. restore my faith in the Maine DEP. There should be no wind projects in Maine.
