Orange shading indicates county rate is significantly worse than the state rate.
Green shading indicates county rate is significantly better than the state rate.

[†]Use caution in interpreting these estimates because they are based upon an unweighted numerator less than 50.

[‡]Rates are age-adjusted to the U.S. 2000 Standard Population.

na: Data not available due to low response rate.

95% CI: 95% Confidence Interval of the rate or percent.

Bar Chart shows county rates in order listed on table from left to right; dark blue bar is the Maine Overall rate.

* Infant mortality rate might be underestimated due to possible missing out-of-state deaths of Maine infants in 2010.

na: Data not available due to low response rate.

§ Use with caution. Estimates might be unreliable because total number for subgroup in this time period is less than 20.
