

**Multilingual Learners with Disabilities Policy and Resource Guide: Intervention Procedures for Suspected Disability, Evaluation, and Eligibility**

*Process for Multilingual Learners using Multi-Tiered Systems of Supports*

“Students who are experiencing difficulties in the general education setting, including multilingual learners (MLs), may require additional supports or interventions. Multi-Tiered Systems of Supports (MTSS) are designed to ensure all students have equitable opportunity and access to high-quality instruction to reach their greatest potential. For students who are MLs, linguistic and cultural factors must be considered at each step throughout the process as teams analyze and interpret school performance in view of their unique backgrounds.

With any ML student referral to the MTSS team, the following questions should be examined and responded to **before a referral** for a special education evaluation is made.” (pages 7-8)
