

**Beginning with Habitat (BwH)**  
 equips Maine communities, landowners, and conservation partners with tools to protect, restore, and connect important habitats and ecosystems in a changing climate.

## Water Resources & Shoreland Habitats

### Lake View Plt

*This map is nonregulatory and is intended for planning purposes only*

- Organized Towns**
- Unorganized Towns**
- Atlantic Salmon Habitat** Reflects surveys on selected Maine streams.
- Source Water Protection Areas** Buffers that represent source water protection areas for wells and surface water intakes that serve the public water supply. Their size is proportional to population served and/or by the type of water supply system. These buffers range from 300 to 2,500 feet in radius.
- Aquifers** Flow of at least 10 gallons per minute.
- NWI Wetlands** National Wetlands Inventory (NWI) uses aerial photographs to approximate wetland locations. NWI data is not comprehensive mapping of wetlands resources and typically under represents the presence of wetlands on the landscape.
- Shoreland Areas** Depicted using common regulatory zones including a 250-foot-wide strip around Great Ponds and wetlands (features of at least 10 acres), rivers, coastline, and 75-foot-wide strip around streams. For more information on Mandatory Shoreland Zoning - <https://www.maine.gov/dep/land/slz/>
